

Cluster Name 「SUSANOO」

SUSANOO Corporate Group seeking operations for aircraft business,with specialty steel machining technology at its core.

SUSANOO consists of seven companies. One is the material testing company.The others are machining companies.

1. Material Testing

Our laboratory is equipped with a variety of testing machines such as MTS fatigue testing machines, creep rupture testing machines, rotation bending fatigue testing machines, and tensile testing machines.

2. Machining

We have a rich history of machining and high-level technical skill in difficult-to-cut materials (nickel alloys, titanium alloys, specialty steel very hard materials, etc.) stretching back over 30 years.

We own machining equipment that supports diverse size variations.

-Full support for everything from milli-size small parts to meter-size large parts -

Pictures and photo etc.
